

# A

## PART A: IMAGE READING

### Next Nature

Next nature is a nature caused by humans and their technological inventions.

### Assignment

You'll work on assignment 1 and 2 in groups of four. Find matching pictures. Put all the cards on the table turned face up.

Try to answer the following questions together:

- a) What do you see on the cards?
- b) Which card is an example of the old nature and why?
- c) Which card is an example of next nature and why?

After you've all decided on a set: draw a line between the images below. Write down why you think this is a match. Discuss in complete sentences!

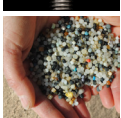

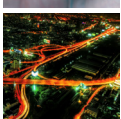

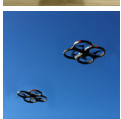

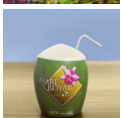

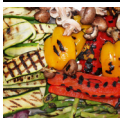

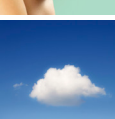

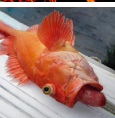

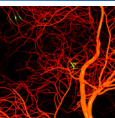

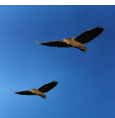

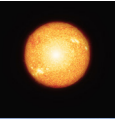

1. Draw lines

2. Why is it a pair?

### Example

They are both cows: both cows are adjusted by humans, but one cow is a living animal while the other is a robot and is not able to think or feel.

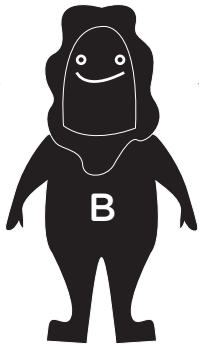

# B PART B: CREATIVE THINKING

### Assignment

You will make your own memory-set in a group of four.

**Card 1** is about a existing object from the old nature and

**Card 2** is an next nature invention imagined by you.

### Mind map

A mind map is an collection of ideas. In the middle of the mind map you'll write one word, around it you will write everything that comes to your mind. There is no wrong answer, because they are your thoughts. Don't think about the outcome, but think about the process.

## 1 : Mind map of previous nature

Make a mind map for the first card with your group. Think of all sorts of existing objects from the old nature and write the ideas of all group members inside this cloud. This can be anything you like: from pencil to humans and cars. There are no rules.

## 2 : Describe the first card

Choose one subject you find most interesting from the mind map about previous nature. This will be the theme for your memory.

### Answer the following questions:

What is the object called? \_\_\_\_\_

What can it do? \_\_\_\_\_

What does it look like? \_\_\_\_\_

What color does it have? \_\_\_\_\_

What does it smell like? \_\_\_\_\_

How does it feel? \_\_\_\_\_

Where is nature in this object? \_\_\_\_\_

Did humans already adjust the object? \_\_\_\_\_

\_\_\_\_\_

Is it born or is it made? \_\_\_\_\_

\_\_\_\_\_

## 3 : Mind map next nature invention

Make a mind map in your group about card 2: a next nature invention. Write the chosen subject of card 1 in the middle of the cloud. Write down all the ideas you have about the next nature version of this subject. There's only one rule: the next nature invention can't be something already existing nor be already thought of by someone else, be creative.

## 4 : Describe the second card

Choose one of your ideas or combine your ideas to define your next nature invention.

### Answer the following questions:

What is the invention called? \_\_\_\_\_

How does it work? \_\_\_\_\_

What does it look like? \_\_\_\_\_

What color does it have? \_\_\_\_\_

What does it smell like? \_\_\_\_\_

How does it feel? \_\_\_\_\_

Where is nature in this object? \_\_\_\_\_

Did humans already adjust the object? \_\_\_\_\_

\_\_\_\_\_

Is it born or is it made? \_\_\_\_\_

## 5 : Create your own card set

You can now start creating your own memory set. First make a sketch on a empty paper sheet. Discuss which sketch is telling a good story, who is good at coloring, who's good at drawing etc. Come up with a plan and divide the tasks. Could you combine the sketches? What materials do you need? Who is going to draw? Who is going to present the card set?
